How likely are you to recommend this session to a friend or colleague? (1-10)

8.4

Please let us know if you have any other comments or suggestions:

Was waiting for more "constructive" session

good job!
Great job Mike!!
Entertaining & independent perspective
I expected more technical content.
A bit unnuanced on how some features can be used to improve a situation when outside constraints limit what options are available to the sysadmin.
fun!
Very good speaker, some Funny jokes makes it easier don't fall to sleep (VMworld Party ;-))
More technical knowledge needed, more focus recommended
witty and funny
Always makes speeches entertaining. His honesty is a breath of fresh air compared to the sanitized marketing from other sessions.
best session so far @ Vmworld 2010 CPH ! well done !
Fair presentation, we should have more of these vendor decoupled presentations
Many sessions speakers (Mostly Vmware Asian) could learn a lot from the way Mike brings a product to the session.
Mike is the best speaker, awesome, magic really
Some more on topic and deep dive would be nice.
Be more aware of time
Entertaining and informative. Vmware should take more notice of ppl like mike. The products are very expensive, so they owe it to customers to make them the best they can be. Field experience is invaluable for this.
Too much NetApp promotiob :-)
excellent speaker, good topics, I also appreciated the after-session discussion
Mike is very good.
May be the best speaker in the conference!
One of the best sessions of WM World Europe 2010!!
Great, very informative
good info on some gotchas to look out for...
Best session so far!
Expected more technical content
Interisting And enjoying Session
Mike I is a legend long may he stay independent !
very good speaker
Good guy
A good overview on the practical aspects, and experiences of the product.
